

T-Post Extraction Made Easy!

Easily pulls on soft ground when mounted on board

Makes quick work of removing T-posts in farming and ranching fence applications

Pulls T-posts for construction, traffic and event barricades

The JackJaw[®] 203 is
Versatile and Powerful!

- Pulls T-posts straight out
- Fast, easy extraction
- Prevents back strain
- Direct grip on T-post, no slipping
- Powerful, lightweight (18lbs) all-steel construction
- Ranching, construction, snow fence, electric fence

The JackJaw® Advantage

JackJaw® T-post extractors are the new force in fence post pulling. The powerful, patent pending jaw and lever mechanism allows you to pull the T-posts straight out of the ground without damaging the t-posts. The sturdy lever arm gives you a 9 to 1 mechanical advantage. A 100lb push down on the handle generates a 900lb upward force and an 1800lb gripping force on the T-Post. Tilted posts? No problem! Just lean the JackJaw® extractor to align with the post.

Made to Last

JackJaw® 203 T-post extractors are assembled in Dayton, Ohio from heavy gauge steel plate and tubing to withstand everyday job site use. The easily replaceable jaws are case hardened AR400 steel for long wear. No paint to chip. JackJaw® units have a zinc and clear chromate plating for long lasting durability and corrosion resistance.
